

WCIE subscribers:

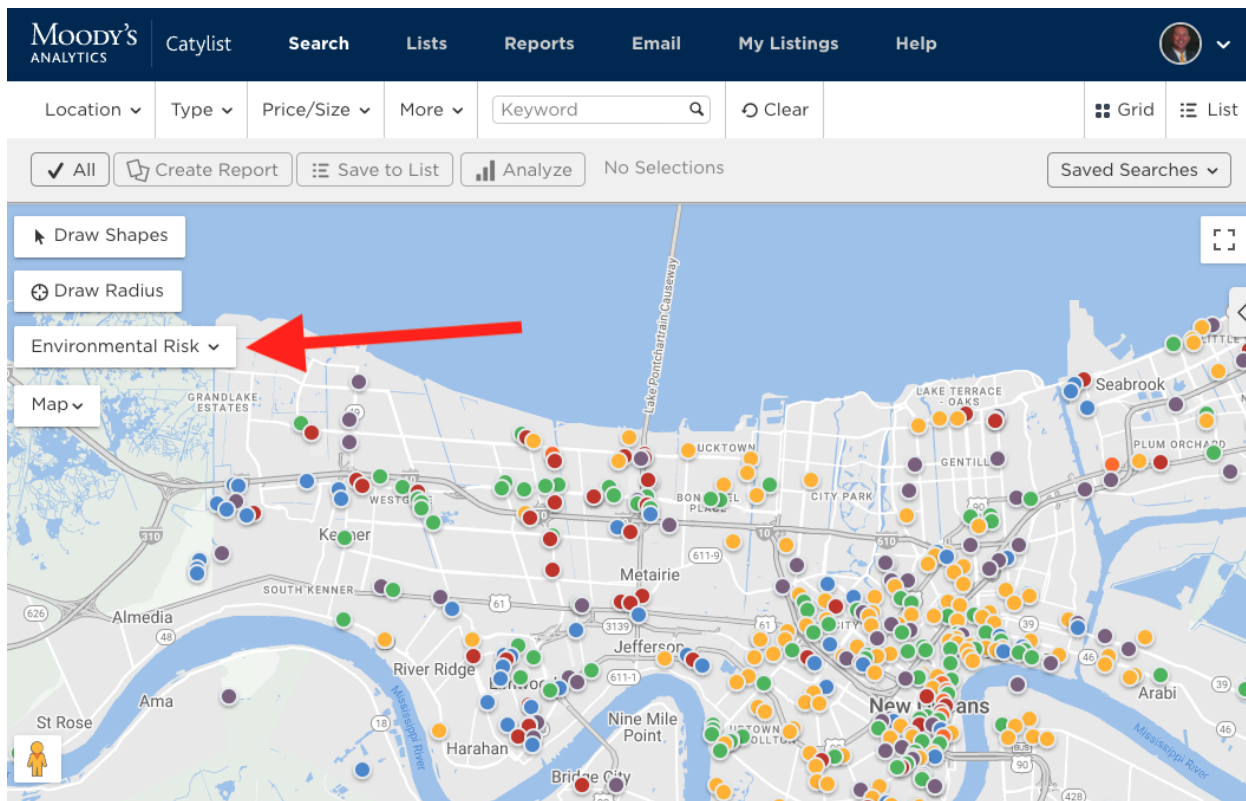

Please scroll for six new enhancements to the Moody's WCIE platform.

1. We have added an Environmental Risk search filter and map layers which was part of the 2023 Roadmap.

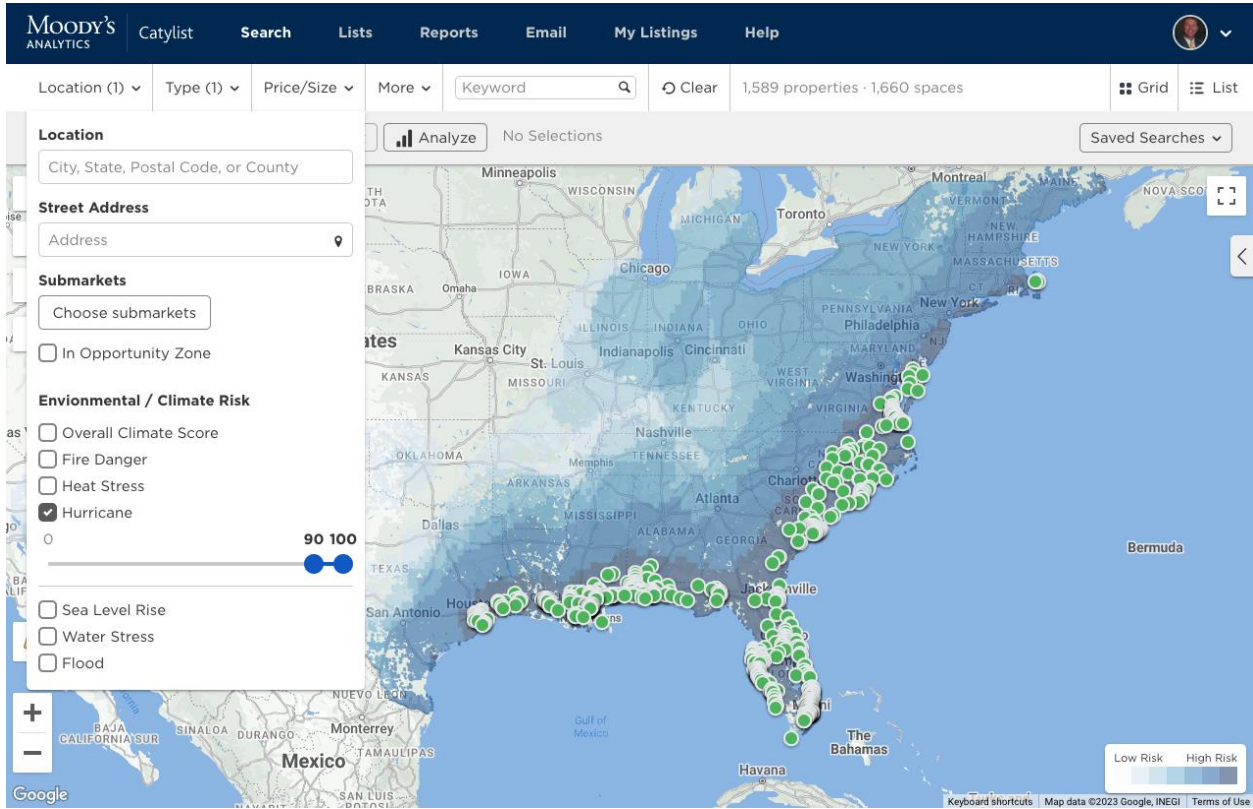

Options include:

- Overall Climate Score
- Fire Danger
- Heat Stress
- Hurricane
- Sea Level Rise
- Water Stress
- Flood

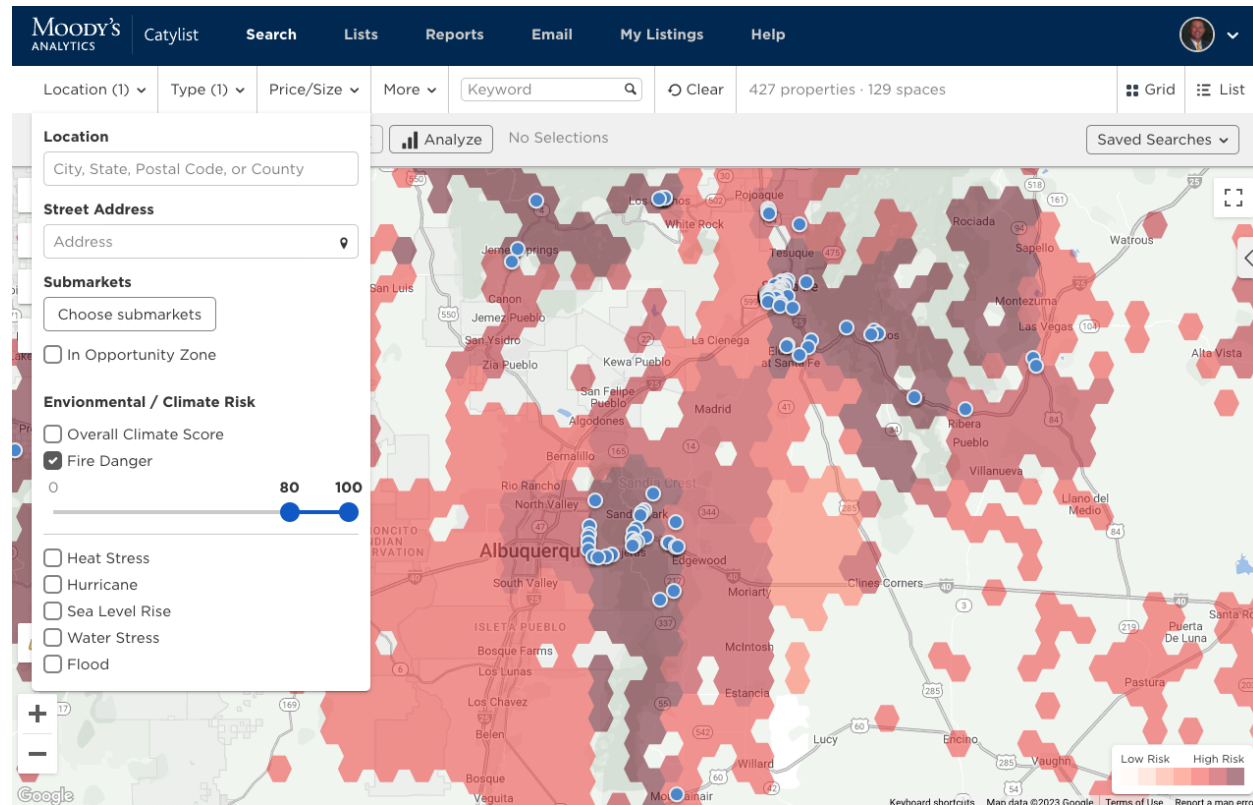

See snapshot below:

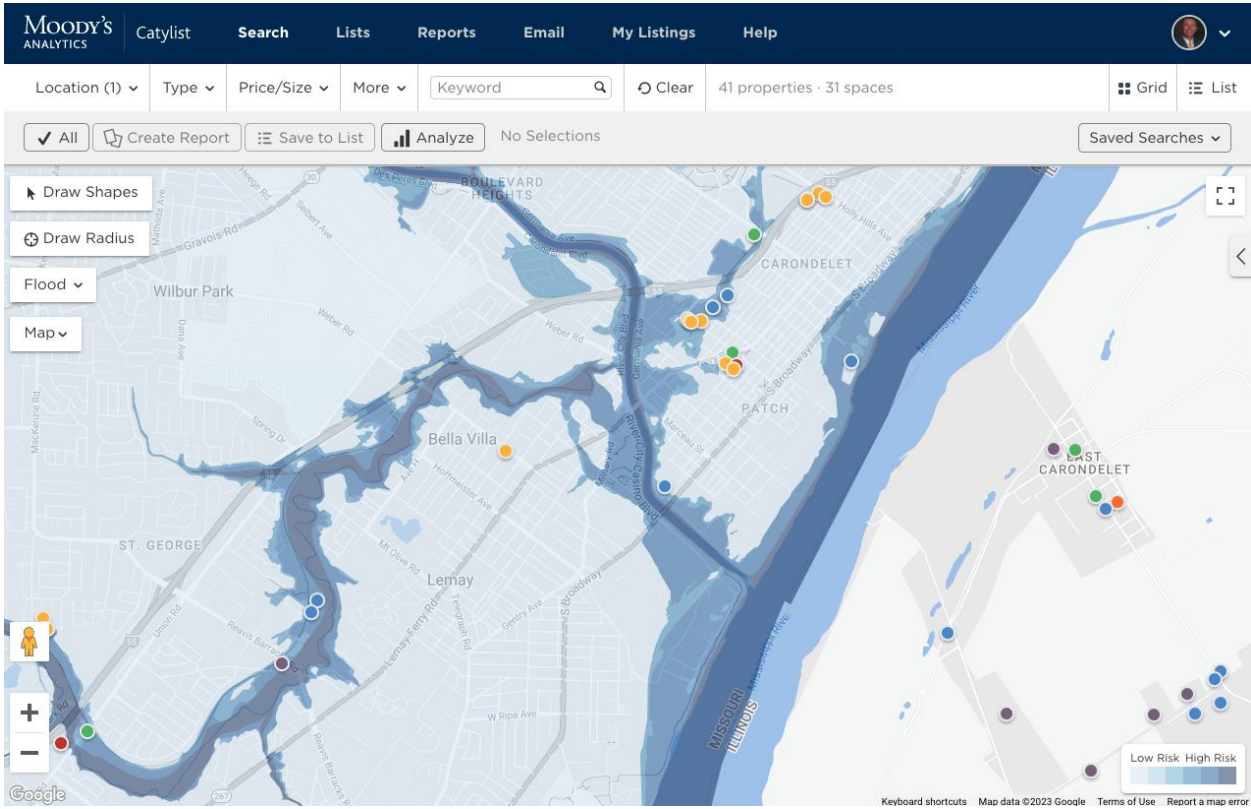

2. Users can focus on each risk category to filter their results using the sliders under the "Location" filter menu. Below is an example of retail buildings in the highest risk areas for hurricane damage. See snapshot below:

3. Below are examples of an Industrial properties in areas of wildfire risk near Albuquerque, NM. See snapshot below.

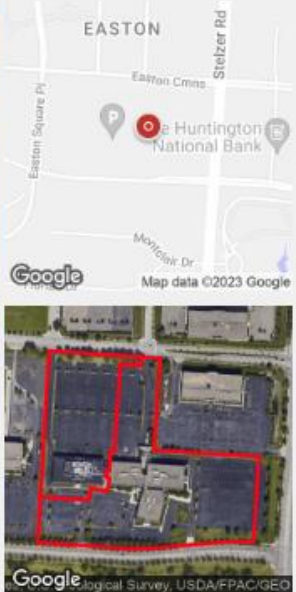

4. For Sea Level Rise and Flood, we have integrated more granular data layers which display automatically at tighter zoom levels. See example snapshot below.

- To review in more detail the risk profile of a particular property, you can now click into the "Location" tab. See snapshot below.
